

# BUILDING DASHBOARD

*A Single Window for All Tools and Data*

## Smart Property Management

Since 1995, Archidata offers a web solution for real estate managers. The plans archived on the Archidata platform are leveraged by extracting the information needed for space management and making it accessible rapidly and securely.

**RELIABLE INFORMATION WHEN YOU NEED IT!**

The Archidata Solution integrates with existing management systems. It is a global solution that follows the life cycle of a building. Our platform offers a set of tools for three sectors of activities: assets, buildings and projects. Many tools are offered to provide reliable information for all real estate activities.

The Building Dashboard tool visualizes in 2D and 3D each building by floor, unit, room and workstation. It allows to navigate into each component of a portfolio in order to access up-to-date information. The information drawn from the plans are areas and volume for units, common areas and rooms; equipment, specs sheets, etc.

## BENEFITS

- Provides easily accurate information
- Visualizes quickly the available information for each building
- Accesses all the tools of the Archidata Solution from a single screen
- Converts graphic information into management data and vice versa
- Shares accurate information between management systems
- Saves time and travel expenses

Quick links of the dashboard can be set according to the specific needs of each client and give easy access to all tools. The Archidata Solution is based on a single window approach for all building information.

## Dashboard view

**SPACE TYPE**

- Floor Zones
- Unit Zones
- Space Zones
- Office Zones
- Project Zones

**OBJECT TYPE**

- [A] Substructure
- [B] Shell
