

Smart Property Management

Since 1995, Archidata offers a web solution for real estate managers. The plans archived on the Archidata platform are leveraged by extracting the information needed for space management and making it accessible rapidly and securely.

Reliable information when you need it

The Archidata Solution integrates with existing management systems. It is a global solution that follows the life cycle of a building. Our platform offers a set of tools for three sectors of activities: assets, operations and projects. Many tools are offered to provide reliable information for all real estate activities.

BUILDING DASHBOARD

A Single Window for All Tools and Data

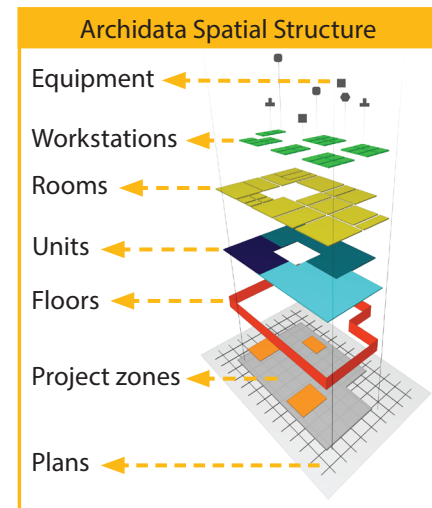

The Building Dashboard tool visualizes in 2D and 3D each shopping center by floor, unit, room and common area. It allows navigation into each component of a portfolio in order to access up-to-date information. The information extracted from the drawings and Revit files include such items as areas and volume

for units, common areas and rooms, equipment, and spec sheets.

Quick links of the dashboard can be configured according to the specific needs of each client and give easy access to all tools. The Archidata Solution is based on a single window approach for all building information.

BENEFITS

- Provides accurate, updates information quickly
- Displays graphically the available information for each building
- Accesses all the tools of the Archidata Solution from a single screen
- Converts graphic information into management data and vice versa
- Provides updated floor maps to all store locator applications (panel, Web and mobile)
- Shares accurate information between management systems
- Saves time and other providers costs

Space type

- Floor Zones
- Unit Zones
- Room Zones
- Workstation Zones
- Project Zones

Object Type

- [A] Substructure
- [B] Shell
- [C] Interior
- [D] Services
- [E] Equipment
- [F] Construction
- [G] Site work
