

EQUIPMENT MANAGEMENT

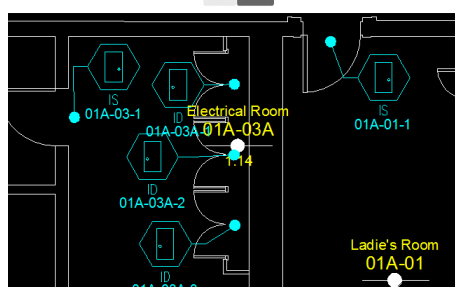

Inventories of Equipment for Better Asset Management

This Management tool indexes all equipment by room and building in 2D and 3D. It manages, visualizes and prints a list of equipment directly from the plans, without AutoCAD. The location of equipment is kept up to date and the access to the database is tiered according to the security level given to users.

EQUIPMENT CATEGORIES

This tool creates inventories of all equipment categories in accordance with the Uniformat II norm. Here's an example of what our clients keep track of: asbestos, mechanical systems, fire prevention, electricity, telecom systems, floors and ceilings finishes, etc.

A	B	C	D	E	F	G
SUBSTRUCTURE	SHELL	INTERIORS	SERVICES	EQUIPMENT & FURNISHINGS	SPECIAL CONSTRUCTION & DEMOLITION	SITWORK
 Foundations A10	 Superstructure B10	 Int. Construction C10	 Conveying D10	 Equipment E10	 Special Const. F10	 Site Preparations G10
 Basement Const. A20	 Ext. Enclosure B20	 Stairs C20	 Plumbing D20	 Furnishings E20	 Bldg Demolition F20	 Site Improv. G20
 Grid A30	 Roofing B30	 Int. Finishes C30	 HVAC D30	 Perm. Fittings E30	 Asbestos F30	 Civil/Mech. Util. G30
	 Structural Beams B40	 Locks C40	 Fire Protection D40	 Wayfinding E40	 Health & Security F40	 Electrical Util. G40
	 Structural Posts B50	 Doors & Windows C50	 Electrical D50	 Personnel E50	 Inspection F50	 Others G50
	 Structural Walls B60	 Nemed Areas C60	 Telecom D60	 Photos E60

BENEFITS

- Reduces maintenance costs
- Minimizes peripheral databases and subsystems
- Lowers the cost of updates and purchases of AutoCAD licenses
- Reduces cost to update alphanumeric systems affected to preventive management of assets, sanitary and other systems

Smart Property Management

Since 1995, Archidata offers a web solution for real estate managers. The plans archived on the Archidata platform are leveraged by extracting the information needed for space management and making it accessible rapidly and securely.

RELIABLE INFORMATION WHEN YOU NEED IT!

The Archidata Solution integrates with existing management systems. It is a global solution that follows the life cycle of a building. Our platform offers a set of tools for three sectors of activities: assets, buildings and projects. Many tools are offered to provide reliable information for all real estate activities.
